WHAT CAN BE DONE

■ Create awareness on the harmful effects of child marriage, teenage pregnancy, FGM and GBV.
■ Ensure enforcement of penalties and prosecution of perpetrators of GBV.
■ End FGM and Child Marriage.
■ Empower girls and women with information, skills, and support networks.
■ Operationalizing the VAPP Act and Establishing GBV specialized courts for speedy trials of GBV cases.
■ Guarantee girl child education.

WHY WE NEED TO ACT

■ GBV is life-threatening with long-lasting adverse consequences on survivors.
■ GBV can result in death of girls and women.
■ High maternal mortality rates as a result of teenage pregnancy, child marriage and FGM.
■ High economic costs for complications related to GBV.

CHALLENGES

■ Commodification of the female child.
■ Lack of awareness and sensitization on the negative impact of GBV.
■ Lack of protection for survivors.
■ Social norms that promote child marriage, teenage pregnancy, FGM and GBV.
■ Low literacy rate.
■ Poverty.

ACTION REQUIRED

■ Create awareness on the harmful effects of child marriage, teenage pregnancy, FGM and GBV.
■ Provide support and empowerment to survivors of GBV.
■ Provide adequate training on best practice for all agencies providing support to survivors of FGM, child marriage and teenage pregnancy.
■ Ensure enforcement of laws against GBV, FGM, child marriage and teenage pregnancy.
■ Enforce education laws.
■ Address harmful social norms.
■ Engage religious/traditional gatekeepers.

End all forms of Gender-Based Violence and Harmful Practices Against Women and Girls in Nigeria

Context

In Nigeria, violence against women is evident in many forms, including domestic, verbal, and physical abuse, rape and sexual assault, early and forced marriages, incest, female genital cutting, acid baths and outright killing. Women continue to suffer all forms of degradation and deprivation in public and private spaces.

You can end all forms of gender-based violence by taking action NOW!
Female Genital Mutilation (FGM)

All procedures that involve partial or total removal of the external female genitalia, or other injury to the female genital organs for cultural or other non-medical reasons.

BACKGROUND

Global estimates published by WHO indicate that about 1 in 3 (35%) of women worldwide have experienced either physical and/or sexual intimate partner violence or non-partner sexual violence in their lifetime. In Nigeria, 23% of women have experienced physical violence since age 15. In 2017, 14% of women experienced physical violence. Most of this violence is perpetuated by an intimate partner. Worldwide, almost one third (30%) of women who have been in a relationship report that they have experienced some form of physical and/or sexual violence by their intimate partner in their lifetime.

BACKGROUND

Any form of violence that results in, or is likely to result in, physical, sexual, or mental harm or suffering to women, girls, men, and boys, including threats of such acts, coercion or arbitrary deprivation of liberty, whether occurring in public or in private life.

FACTS

- 24% of urban women have experienced FGM compared to 16% rural women.
- The prevalence of FGM increases with age; 14% of women aged 15-19 have been circumcised, compared to 31% of women aged 45-49.
- Female circumcision occurs mostly during infancy; 86% of women aged 15-49 were circumcised at less than 5 years of age.

Gender-Based Violence (GBV)

Any act of violence that results in, or is likely to result in, physical, sexual, or mental harm or suffering to women, girls, men, and boys, including threats of such acts, coercion or arbitrary deprivation of liberty, whether occurring in public or in private life.

FACTS

- 15% divorced/separated/widowed and 9% married women have experienced sexual violence.
- 49% divorced/separated/widowed and 35% married women have experienced spousal violence.

Women who have experienced physical violence from age 15

- NW: 12% (38% rural, 43% urban)
- NC: 30% (43% rural, 38% urban)
- SW: 30% (46% rural, 36% urban)

Prevalence of FGM by zones in Nigeria

- North West: 20.2%
- North East: 6.1%
- North Central: 9.3%
- South West: 10.4%
- South South: 17.7%
- South East: 35%

In Nigeria, 22 million women who have experienced FGM compared to 16 rural women.

Healthcare

The most common type of FGM (41%) is excision (Type 2) where a female is cut and the flesh is removed, while 10% have a clitoridectomy (Type 1) where a female is cut, no flesh removed and 6% have an infibulation (Type 3) where the vaginal opening is sewn closed or narrowed (infibulation). FGM may result in physical, emotional and psychological complications. These complications can be experienced immediately after the experience to much later in life.

Child Marriage

Any formal marriage or informal union between a child under the age of 18 and an adult or another child.

In Nigeria, 22 million women who have experienced FGM compared to 16 rural women.

Healthcare

The most common type of FGM (41%) is excision (Type 2) where a female is cut and the flesh is removed, while 10% have a clitoridectomy (Type 1) where a female is cut, no flesh removed and 6% have an infibulation (Type 3) where the vaginal opening is sewn closed or narrowed (infibulation).
